 - www.ppgpaints.com/store-locator
 - Type in zip code for nearest store.

How To Use PREP 400

Duranar GR

- Spray any vegetation with water before and after use if they may come in contact with Prep 400
- Conduct a test patch!
- Apply with a spray bottle or pump-up sprayer
- Allow to dwell for 10-60 seconds
- Wipe with a clean cloth or scrub with a nylon brush
- Dwell time depends on many factors but most paint and overspray should lift within 10 minutes.
- Spray paint may leave ghosting on some surfaces due to damage from the solvents in the paint.
