

PPG LABORATORY TEST RESULTS CERTIFICATION

ALKALI RESISTANCE SODIUM HYDROXIDE

PPG Industries, Inc. certifies the following performance properties for the Duranar® Coil Coating System when applied and baked on properly cleaned and pretreated substrates, according to PPG specifications:

COATING: DURANAR

TEST: ASTM D1308 - Reagent 6.1.5, Procedure 7.2

SPECIFICATION: A coated panel is subjected to a 10% and 25% sodium hydroxide spot test for a period of 1 hour. The panel is then washed with distilled water, and examined for any effects of significant color change, blisters and overall appearance.

RESULTS: No effect on coating.
