**PRODUCT INFORMATION**

**Product Codes:** The product code for *Coraflon* ADS Intermix Metallic Component A is ADS9xxxxXL. The XL designation at the end of these codes indicates a clear coat is required. Newer *Coraflon* ADS codes are designated ADxZxxxxX where Z indicates a metallic color and the X indicates a clear coat is required. ADS1B is Component B Curing Agent.

**Product Type:** Component A is formulated using only 100% FEVE (fluoropolymer) resins. Component B is an aliphatic isocyanate.

**Product Description:** *Coraflon* ADS Intermix Metallic is a two component fluoropolymer metallic finish that provides excellent color and chalk resistance. *Coraflon* ADS Clear is intended for use over certain colors and all metallic intermediate coats. Please contact Technical service for specific recommendations.

**TEST DATA**

Performance data may vary depending on substrate, surface preparation, system selected, color, and/or film build.
SURFACE PREPARATION

The service life of the coating is directly related to the surface preparation. The surface to be coated must be properly prepared, dry, clean and free of all contamination. WARNING! If you scrape, sand, or remove old paint, you may release lead dust or fumes. LEAD IS TOXIC. EXPOSURE TO LEAD DUST OR FUMES CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a properly fitted NIOSH-approved respirator and prevent skin contact to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the USEPA National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead. In Canada contact a regional Health Canada office. Follow these instructions to control exposure to other hazardous substances that may be released during surface preparation.

Aluminum
When using Corflon ADS Wash Primer ADS225/ADS226), solvent clean per SSPC-SP 1. Minimum surface preparation SSPC-SP 2/SP 3 Hand Tool/Power Tool Clean. Solvent wipe to remove dust. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer

If not using Corflon ADS Wash Primer, solvent clean per SSPC-SP 1. Abrade substrate to remove gloss and obtain minimum surface profile of 1.0 mil. Solvent wipe to remove dust. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer

Ferrous Metal
Recommended surface preparation commercial blast per SSPC-SP 6. Minimum surface preparation SSPC-SP 2/SP 3 Hand Tool/Power Tool Clean. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer, ADS570 Corflon ADS Zinc Rich Epoxy Primer

Galvanized Steel
Abrasive blast per SSPC-SP 7/NACE 4 “brush off blasting” for removal of passivator that may be present. Obtain a surface profile of 1.0-2.0 mils. Ensure passivator not present. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer

Previously Coated Metal (Non PVDF)
Remove all loose paint. Abrade surface to remove gloss and obtain surface profile. Minimum surface preparation SSPC-SP 2/SP 3 Hand Tool/Power Tool Clean. Remaining coatings should be tested for adhesion and for lifting by the primer. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer,

PVDF Coated Aluminum and Steel
Solvent clean per SSPC-SP 1. Abrade substrate to remove gloss and obtain minimum surface profile of 1.0 mil. Solvent wipe to remove dust. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS510 Corflon ADS Epoxy PVDF Bonding Primer

Steel
Recommended surface preparation commercial blast per SSPC-SP 6. Minimum surface preparation SSPC-SP 2/SP 3 Hand Tool/Power Tool Clean. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer

Tightly Adhered Rust
Remove all loose paint, mill scale and rust. Steel: SSPC SP-2/SP-3 Hand/Power Tool Cleaning minimum. Old coatings should be tested for adhesion of the existing system and lifting by primer and topcoat. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer

Weathered Galvanized Steel
Recommended surface preparation commercial blast per SSPC-SP 6. Minimum surface preparation SSPC-SP 2/SP 3 Hand Tool/Power Tool Clean. The appropriate primer must be used for the substrate to be coated. Corflon ADS Primers are available for use on various substrates. **Primer:** ADS573 Corflon ADS Epoxy Intermediate Primer
CORAFLON®
Architectural Coatings

PPG Architectural Finishes, Inc. believes the technical data presented is currently accurate; however, no guarantee of accuracy, comprehensiveness, or performance is given or implied. Improvements in coatings technology may cause future technical data to vary from what is in this bulletin. For complete, up-to-date technical information, visit our web site or call 1-800-441-9695.

Coraflon ADS Intermix Metallic

MIXING AND THINNING INFORMATION
Mix Ratio by Volume: 16.2:1 (ADS A Component:ADS1B)
Mixing Instructions: Agitate Coraflon ADS Intermix Metallic A Component thoroughly prior to blending. Add ADS1B to Coraflon ADS Intermix A Component and mix well. Thoroughly drain curing agent from its container to insure proper mix ratio.
Induction Time: Not applicable
Pot Life: 4 hours at 77°F (25°C)
Thinning: Thin as needed up to 20% with ADS706, ADS710 or ADS719
Accelerator: None available

THIS PRODUCT IS MOISTURE SENSITIVE. AVOID MOISTURE CONTAMINATION.

APPLICATION
Coverage: 240 to 352 sq. ft./gal. (22.3 to 32.7 sq. m/3.78 L)
Coverage figures do not include loss due to surface irregularities and porosity or material loss due to application method or mixing.

Wet Film Build: 4.5 to 6.7 mils (mixed & thinned)
Dry Film Build: 1.5 to 2.2 mils

Application Method:
Conventional airspray or HVLP recommended, using alternative methods of application may result in an unacceptable appearance.

Air Spray: DeVilbiss MBC gun, 704 or 777, air cap with “F” tip and needle or equivalent. Atomizing pressure 55-70 psi. Spray equipment must be handled with due care and in accordance with manufacturer's recommendation. High-pressure injection of coatings into the skin by airless equipment may cause serious injury, requiring immediate medical attention at a hospital. Explosion-proof equipment must be used when coating with these materials in confined areas. Keep containers closed and away from heat, sparks, and flames when not in use.

DRYING SCHEDULE
Air Dry @ 77°F(25°C), 50% relative humidity
To Touch: 1 to 2 hours
To Handle: 10 to 12 hours
To Recoat: 4 hours

Drying times listed may vary depending on temperature, humidity, film build, color and air movement.

SAFETY
Safety: Before using the products listed in this publication, carefully read each product label and follow directions for its use. Read and observe all label and Material Safety Data Sheet (MSDS) information prior to use. MSDS are available by calling 1-800-441-9695. Utilize appropriate safety practices including use of proper personal protective equipment. See MSDS for details.

Ventilation: This product contains flammable solvents. Keep away from sparks and open flames. When working in enclosed areas, proper ventilation and air circulation must be maintained during and after application and coating cure. Before coating application, an assessment of the ventilation system should be made to ensure solvent vapors are effectively removed from the area. Effective solvent removal will prevent collection of solvent vapor which could provide an ignition source, fire or explosion.

LIMITATIONS OF USE
For Professional Use Only. Not intended for Residential Use. These products require specialized training. Please contact your PPG Technical Sales Representative for proper use and application recommendations.

Apply only when air, product and surface temperatures are above 50°F (10°C) and surface temperature is at least 5°F (3°C) above the dew point. Air and surface temperatures must remain 50°F (10°C) for at least 24 hours. Avoid painting late in the day when dew and condensation are likely to form or if rain is predicted.
